Oumeima Limeme

Full-Stack Engineer

Konstanz, Germany | +49 15129888262 | oumeimalimeme@gmail.com | linkedin.com/in/oumaymalimeme | github.com/OumaymaLimeme | Portfolio

Summary

Full-Stack Engineer with 2+ years of experience building web and mobile products across aviation, logistics, and AI-driven SaaS. Strong on the front-end with React, Angular, Next.js, and Vue, and on the back-end with NestJS, FastAPI, and Node.js.

Professional Experience

Unisphere GmbH **Jan 2026 – Present**
Front-End Engineer *Konstanz, Germany*

- Lead front-end development of the aviation mission operations platform for Advanced Air Mobility (AAM), a system where real-time vertiport monitoring directly supports safety-critical flight decisions.
- Shipped interactive geospatial map modules covering vertiports and flight trajectories.
- Developed NOVA Admin Panel, an internal multi-tenant management platform enabling Unisphere to oversee and manage (create, update, quota control, subscriptions) organizations and users.

Technology: Vue.js, Pinia, TypeScript, JavaScript, Pictogrammers, GitHub

EVIMO **Nov 2025 – Jan 2026**
Full-Stack Engineer *Remote, France*

- Owned the end-to-end build of EVIMO, AI-powered maintenance platform for EV charging infrastructure serving operational teams for organization management, asset tracking, and user administration.
- Implemented multi-tenant authentication and role-based access control, isolating data and permissions across tenant organizations on shared infrastructure.
- Structured the backend microservices around Clean Architecture, DDD, and CQRS, cutting code coupling by roughly 40% and giving the team a cleaner path to add new modules.
- Automated API documentation with Swagger/OpenAPI and set up CI/CD pipelines in GitHub Actions.

Technology: React, Next.js, NestJS, Prisma, Clean Architecture, DDD, CQRS, PostgreSQL, AWS, Docker, Ant Design, Swagger/OpenAPI, TurboRepo, GitHub Actions, Jira

Shipzzer **Aug 2024 – Oct 2025**
Full-Stack Engineer *Tunis, Tunisia*

- Shipped 4 production features across Shipzzer's logistics SaaS (web and mobile), supporting 500+ daily container operations and improving yard management.
- Cut manual support interventions by 40% after rolling out self-service features, freeing engineering and ops capacity for higher-value work.
- Refactored the admin module used daily by 100+ ops staff for employee presence monitoring and yard role assignment, resolving recurring stability issues and improving load time.
- Audited 60K+ line codebase and patched the security vulnerabilities found, reducing overall platform risk.
- Migrated the company landing page to Angular 19, improving SEO and Core Web Vitals scores, and integrated WordPress blog content via REST APIs with the marketing team.

Technology: React.js, Angular, React Native, Redux, Express.js, WordPress, SQL, TypeScript, Cloud Functions, Firebase, GCP

Talan **Feb 2024 – Jun 2024**
Software Engineer Intern *Tunis, Tunisia*

- Built full-stack credit management application, enabling employees to submit, track, and manage credit workflows end-to-end and automating around 80% of previously manual tasks.
- Designed self-service portal giving employees a single entry point, replacing a fragmented multi-step manual process.
- Secured application with JWT-based authentication and role-based access control, ensuring only authorized employees could access and action credit requests.

Technology: React, TypeScript, Python, FastAPI, SQLAlchemy, PostgreSQL, JWT, REST APIs, Git, GitHub

Projects

Async Document Processing Pipeline | *Personal Project* **Jul 2025 – Aug 2025**

- Designed an async distributed pipeline using FastAPI and RabbitMQ, handling PDF/CSV ingestion.
- Instrumented the system end-to-end with Prometheus metrics and Grafana dashboards, giving real-time visibility into queue depth, worker throughput, and error rates.
- Containerised all services with Docker Compose, enabling horizontal worker scaling with a single command.

Python, FastAPI, RabbitMQ, PostgreSQL, Docker, Prometheus, Grafana

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL
Frontend: React.js, Next.js, Angular, React Native, Vue.js, Pinia, Redux, Tailwind CSS, Ant Design, Material UI
Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, Clean Architecture, DDD, CQRS
Databases: PostgreSQL, MySQL, MongoDB, Firebase, BigQuery, Prisma
DevOps & Cloud: AWS, GCP, Docker, Turborepo, CI/CD, Git, GitLab, Swagger/OpenAPI

Education

National Engineering School of Carthage **Sep 2021 – Jun 2024**
Master's degree in Computer Science *Tunis, Tunisia*

Higher School of Science and Technology of Sousse **Sep 2019 – Jun 2021**
Preparatory Cycle in Mathematics & Physics – Ranked top 25% (464/1800) *Sousse, Tunisia*

Languages

Arabic: Native **English:** B2 **French:** B2 **German:** B1
